Marnlen RfID - Flexible Labels that Perform - Even in Harsh Environments

Labels are EPCglobal compliant, with 100% in-process and end-of-line inspection. Our qualified team provides application engineering to support customer needs. Tags can be designed for liquid-filled containers, or for working in metal-filled environments. Our application engineering team assists with tag placement for optimal performance, and performs product-level pilots to ensure results. With access to leading edge antennas and integrated circuits, we are inlay agnostic choosing the best solution for your needs. Our best-of-breed partners work with us to provide you with a total solution. Our team works with you to ensure speed to market.

Our R&D investments in processes, inks, quality, and assembly ensure you are optimally served for your RFID label needs.

- Single source for pressure sensitive labels
- In-line tag insertion, finished label printing and die cutting in one in-line process, including re-insertion capability, to reduce costs
- Any volume job can be handled

Intelligent Labels That Perform

Speed and Quality to Meet Your Most Stringent Requirements

With more than 20 printing presses, the ability to insert RFID inlays at the rate of 250 feet per minute, and a 24x7 secure production operation, Marnlen RFID can meet all of your RFID label/tag/card needs. To ensure quality, incoming materials have certificates of compliance and are randomly inspected for adherence to specifications. Using Six Sigma methodologies for continuous improvement, combined with 100% outgoing inspection at our ISO 9001:2000 certified facility ensures superior quality - first run and every run, for any size job.

One Stop Shopping for Labels and Tags
